MISSION

Unify and coordinate the efforts of SAR Responders in the State of Florida.

The Florida US&R System has become a model for other States to duplicate. What impresses me the most is that we developed this system. Each and every member of these task forces can say that "I" had a part of this systems development. As we continue to move forward to improve this system it requires more research, planning, training and development of procedures and policies. That said, a number of working groups are under construction. These working groups are developed due to a need in it's specialty to gather information, set policy or develop curriculum that allows this system to standardize and become interoperable. Each task force is afforded an equal say in the development of this system and your involvement in these working groups gives you that voice. I allows us to spread the work load around and not burden a small group of individuals to the task of it all. I understand budget issues within each department or agency and where possible I will have working group meetings either through email or Tel-Conference. I would like to try to schedule face to face meetings at the FASAR business meetings in January and July respectively. Eventually, I would like to work with the State on an annual workshop to get real work accomplished. With all that said, I currently have a number of working groups that need to have staffing to move these projects along. I have the task forces identified below and I'm requesting you fill the designated position for the working groups assigned. I have the chair person identified for each working group. I need person to assign to the groups. Please email with the names you are able to fill in each of the working group. Thank you all for the great work you do for your community and this State.

Cheers,

Todd Livingston

FASAR Chairman

FLTF 1

1. Air Deployable Search and Rescue – One member (Rescue Manager)
2. Communications – One member (Communication Specialist)
3. Logistics – One member (Logistics Manager)
4. Medical – One member (Medical Manager)
